

## SE5000 Smart 2 Tachograph Compliance Made Easy

### Tachograph Requirement for Light Commercial Vehicles Stay Compliant with the EU Mobility Package

The SE5000 Smart 2 is Stoneridge's next-generation smart tachograph, built for the evolving light commercial vehicle market. From July 1, 2026, all LCVs used for cross-border commercial transport must be equipped with a smart tachograph. Keep your fleet compliant, safe, and efficient – contact your local service center today to upgrade.

The SE5000 Smart 2 is Stoneridge's next-generation smart tachograph

Thanks to its integrated DSRC interface, authorities can perform remote compliance checks as vehicles pass by, allowing fully compliant drivers to continue their journey without interruption—saving valuable time and operational resources. The system also supports cabotage and worker posting requirements, providing accurate, verifiable data for international transport operations.

Advanced features such as event and fault recording with time stamps, intelligent sensor technology for tamper detection, and secure, encrypted data handling provide an additional layer of reliability and protection. Built with future regulations in mind, the SE5000 Smart 2 is fully updateable for upcoming EU requirements, making it a long-term, future-proof investment.

**With the SE5000 Smart 2, operators are fully prepared—today and for the years ahead**

## LCV Retrofit Kit: Ready to Go!

Upgrade your Light Commercial Vehicles with ease using the Stoneridge LCV Retrofit Kit. This all-in-one solution provides everything needed to fit your vehicle with a SE5000 Smart 2 tachograph – from cables and connectors to all essential accessories. Quick to install, fully compliant, and designed to minimize downtime, the Retrofit Kit takes the hassle out of upgrading your fleet while keeping your operations running smoothly.

### 12V SMART 2 RETROFIT KIT

SE5000 Smart 2  
External GNSS Antenna  
12V DSRC module  
DSRC cable  
DSRC holder  
Double sided tape, 3 pieces  
Radio cage  
Power cable

### 700366/01R01

## EU Mobility Package: Why You Need a Tachograph

The EU Mobility Package, announced in December 2017, sets new rules for the European transport sector to improve drivers' working conditions, enhance road safety, and ensure fair competition and access to European Transport Markets. A key element of this package is the second-generation smart tachograph. In accordance with Annex Smart 2 (EU 2016/799), as adopted by Regulation 2021/1228, a technically advanced tachograph is now mandatory throughout the EU to effectively monitor and enforce these standards. From July 1, 2026, all light commercial vehicles (LCVs) — including transporters, delivery trucks, and vans with a gross vehicle weight between 2.5 and 3.5 tons — used for cross-border freight transport must be equipped with a second-generation smart tachograph.

### Stoneridge SE5000 Smart 2 The Most User-Friendly Tachograph on the Market

## Stoneridge SE5000 Smart 2 Tachograph

The SE5000 Smart 2 is the second-generation smart tachograph from Stoneridge, purpose-built to meet the requirements of the EU Mobility Package I. Designed with a clear and intuitive interface, it makes daily operation straightforward for both drivers and fleet managers. The tachograph automatically records border crossings, supports precise GNSS positioning, and ensures position authentication via Galileo OSNMA, covering EU and AETR countries. This provides reliable, secure, and verifiable location data for full compliance and accurate journey records.

**Stay Compliant**
